

**LANDIAN**

L I T E P A P E R

# BEGINNERS' GUIDE.

1.Features of Landian

2. Unity with the physical world

3. Industries that benefit

4. Decentralized economic system

5. Trading System – Smart Contracts

6. Currency of use – Token LNDA

# 1 | FEATURES OF LANDIAN

- It is a virtual world that has no limits
- It is a cultural and social construction
- It is a world that promotes collective growth
- It is a global community where there are no borders, no differences by race, ideology or creed
- It has spectacular graphics never seen before in a metaverse
- It has a superior technology that favors exchanges at low cost and high speed
- It uses the same network as Netflix (AWS – Amazon Web Services) that processes hundreds of features on more than 100,000 servers.
- Has a reward system
- It has security to avoid competition on the land
- It has security to take care of the health of the human being
- Offer copyright in perpetuity
- Offers physical spaces in the world to interact with the community
- Use the decentralized economic system to give opportunities to everyone

# 2 | UNITY WITH THE PHYSICAL WORLD

- Special attention to physical health, promoting exercise through an awareness wallet
- It has a 100 square meter coffee franchise system.
- It will have physical locations in North America, South America, Europe and Asia. Landian venues will function as incubators, hubs and live event venues where members of the community can gather, interact, express themselves and network to create the world's most unique, unique and disruptive entertainment experiences.
- Each venue will encompass no less than 10,000 square feet (about 929 m<sup>2</sup>) of building space. Inside there is a tokenization project platform and a Landian showroom that showcases available services and facilities. These include accommodation, various bars and restaurants, spas, a green room, an NFT gallery, classrooms for blockchain education, and entertainment quads for social media rooms, virtual world 3D simulators, gaming facilities, nightclubs, studios recording, and more.
- Behaviours within Landian are also regulated by DAO (Decentralized Autonomous Entities) which are the members of the community.

## 3 INDUSTRIES IT BENEFITS

- Education
- Tourism
- Leisure and Show
- Art
- Shops

## 4 DECENTRALIZED ECONOMIC SYSTEM

It is one where decisions are made by consensus by the participation of individuals, private companies or other organizations, outside of a central authority. It is a way of producing, consuming and distributing wealth in a more secure and regulated way by the community. The agreements are reflected in automated contracts called Smart Contract (intelligent contracts).

# 5 | TRADE SYSTEM - SMART CONTRACT

It is a secure contract that is made with programming codes on the blockchain. Hosting in this blockchain cloud means that there are automatically millions of copies on different servers, it is public, unforgeable and indestructible. It allows users to fairly and safely compensate service providers and guarantees the good faith and functionality of the agreements. These contracts can have a large number of different agreements between groups of people under the same contract, thus allowing a greater benefit from each business.
